15<sup>th</sup> July 2015

Our ref: AK

Dear Mrs Daswani,

I write to confirm that the principals of The Pinn Medical Centre (PMC) fully recognise the Pinn Medical Centre Patients' Association (PMCPA) as the only legitimate Patient Participation Group (PPG) representing patients at the PMC. The Objects stated in both its existing and proposed new Constitution adhere fully to the current terms and conditions of the GP contract (April 2015).

We have supported this Association for over 20 years and place great value on the hard work and dedication of all its patient members. The PMCPA is built on solid foundations and its members have served our patient population very well over the years. We are very keen to see this continue.

We commend the PMCPA's Board of Trustees for working so diligently with the Charity Commission and specialist charity lawyers over the last nine months to frame a new Constitution, and for consulting closely with its membership throughout this complex journey.

We welcome the charitable principles on which the new Constitution is based and the transparent and robust procedures and practices that it contains. We look forward to it being ratified at an EGM in September 2015 after the current consultation period with member's ends. This will allow the PMCPA to develop into a more effective body in the future.

We are pleased to note that at the last AGM (9/6/15) the members present unanimously elected three new Trustees. The new appointments bring a useful range of skills and experiences to the Board and help make it more representative of the patient population served by the PMC.

We look forward to working with the PMCPA in the future and we are happy to offer any support it may need to achieve its aims.

Yours sincerely

Dr Amol Kelshiker
